EUROCOMPACT FL02/FL03
WHEN LIGHTNESS STRIKES

SAFETY
Numerous lashing points guarantee a high level of safety.

STEERING
The new steering concept ensures minimal wear and excellent manoeuvrability.

AXLE COMPENSATION
The high axle compensation of 650 millimetres makes negotiating obstacles child’s play.

COUPLING
SCHEUERLE Clever Coupling for fast coupling and uncoupling – also off-road.

LOADING HEIGHT
The optimised flat bed deck facilitates an increased loading height with a lower weight.

OPERATING CONCEPT
Intuitive handling of the low-bed semi-trailer with a new operating concept.

FLEXIBILITY
High degree of flexibility in freight transport thanks to the prismatic-shaped excavator arm recess.

EMPTY WEIGHT
With a bridge height of only 200 mm, the empty weight of the FL02 is only 12,650 kg. Compared to its predecessor, it thus has a payload increase of 20%.

WORLD PREMIERE!
NEVER STOP IMPROVING
It’s not about being better than others, it’s all about becoming even better. This is what counts!
In sport as on the roads!

YOUR ADVANTAGES
AT A GLANCE

The new EuroCompact FL02 and FL03 models stand for lightness with maximum payload, comfort and quality. However, this is not everything. With intelligent equipment features, the EuroCompact FL02 and FL03 models have been enhanced in order to make your fleet more economical, safer and more efficient.
Even the best drivers can also use some support.

SAFE, ERGONOMICAL AND QUICK

Maximum possible safety for your drivers.

Maneuverability
The new steering concept improves manoeuvring and minimises wear.

Time is money
Savings are made on both with the innovative Clever Coupling technology.

More flexibility
With the flat deck, the FL 02 and FL 03 provide significantly more loading height.

Light and strong
The new EuroCompact models make a convincing case with up to 20% more payload.

WORLD PREMIERE!

For transporting:
- EuroCompact FL02
- EuroCompact FL03

Technical data:
- Payload: ca. 36 t, ca. 48 t
- Speed: 80 km/h, 80 km/h
- Axle compensation: 650 mm, 650 mm
- Axle type: Floating Axle, Floating Axle
- Loading height*: 300 mm, 325 mm
- Type of deck: Telescopic flat bed deck, Telescopic flat bed deck
- Tyres: 245/70 R17.5, 245/70 R17.5

*at 100 mm ground clearance (max)

In certain situations, such as on uneven ground, drivers often face the challenge of not being able to connect the low-bed semi-trailer to the gooseneck. With the all-terrain hook coupling from SCHEUERLE, this is now a thing of the past!

Thanks to the unique shape of the hook coupling, the deck can be quickly and safely connected to the gooseneck. Whether off or on-road - the EuroCompact can go everywhere!

Ergonomics and safety characterise the EuroCompact FL02 and FL03. For example, the multi-coupler and power sockets are mounted on the outside of the gooseneck thus making it easier for the driver to access them.

In order to complete the coupling procedure, it is not necessary to access the deck or reach inside the gooseneck. Work accidents are thus avoided, the coupling procedure is accelerated and time-savings are ensured.
