Milestone: TII KAMAG delivers the 100th KAMAG PrecisionTractor

TII Group subsidiary, TII KAMAG, the industry expert for in-plant transports and a leading manufacturer of special vehicles for yard logistics, recently introduced the new KAMAG PT terminal tractor onto the market. Today, the company is pleased to announce that the hundredth KAMAG PT has already been sold and delivered to TII KAMAG partner Toyota Material Handling in Denmark. This significant delivery marks a milestone in the successful history of the KAMAG PT since its market launch.

The KAMAG PT has been specially developed for efficient and precise manoeuvring of semi-trailers and container chassis, and is a key component in modern logistics. With a focus on safety, manoeuvrability and reliability, this innovative tractor satisfies the high demands found in yard logistics operations.

As a versatile and powerful vehicle, the KAMAG PT is used in various industries including freight forwarding, logistics service providers, retail, wholesale as well as manufacturing. It complements TII KAMAG's extensive portfolio of yard logistics solutions and is the successor to the Truck Wiesel.

With enhanced driving characteristics and driver-oriented ergonomics, the KAMAG PT has set new standards in terms of operating comfort and safety. The optimised manoeuvring procedures facilitate faster coupling and uncoupling while the electronically-coordinated, hydrostatic drive ensures precise and efficient handling performance. The redesigned driver's cab provides increased levels of safety and visibility which in turn improves work safety and prevents collision damage. The ergonomically optimised workplace leads to significantly improved workflows.

This successful brand not only underlines TII KAMAG's technological expertise and innovative strength but also the strong European-wide partnership with leading dealers that has made a significant contribution to the success of the KAMAG PT.
