Partner for Italy: Movincar distributes and maintains yard logistics vehicles from TII KAMAG

TII KAMAG is further intensifying its presence in Europe. With Movincar, the TII Group's industry expert for internal transport has acquired an extremely efficient and competent sales and service partner for the whole of Italy. Movincar, a company specialising in handling solutions, will now offer all TII KAMAG yard logistics vehicles to Italian customers.

The Movincar Group is now the sales, rental and service partner for all TII KAMAG yard logistics vehicles in Italy. The product range includes the PrecisionTractor (PT) terminal tractor and the PrecisionMover (ePM and PM) series swap body transporters equipped with electric or conventional drive systems. The company is a subsidiary of the Aporlis Group, an international association of companies offering handling solutions, and specialises in the distribution and trading of intra-logistics and yard logistics solutions from leading manufacturers. "This means that Movincar has the know-how to provide expert advice and support to our most demanding customers as well," explained Peter Brenner, Area Sales Manager at TII KAMAG.

Close-meshed and complete sales and service network in Italy

The CGM Movincar Group covers Italy completely through its comprehensive sales and service network which includes eight of its own branch offices, 100 field service technicians along with numerous other authorised partners. This means that TII KAMAG can now approach customers directly there as well, ensuring the high level of advice and service that TII KAMAG is known for in Italy as well as being a one-stop shopping experience for intra-logistics transport solutions. TII KAMAG's yard logistics vehicles are not only ideal for use in distribution centres throughout Italy but also in all other logistics company depots and transport companies. Through the cooperation with Movincar, TII KAMAG will significantly increase the sales of its yard logistics vehicles in the country as well.

KAMAG PrecisionMover und PrecisionTractor: bestseller among yard logistics vehicles

The KAMAG PrecisionMover (PM), also known as the Wiesel, has become a bestseller since its introduction in 1995. Currently, there are over 2,500 KAMAG PMs in use in more than 20 European countries. One of the key strengths of the PrecisionMover, in addition to its universal applicability in yard logistics, is the use of numerous components taken from large-scale production in the areas of the drive system and axles. This facilitates low operating costs as well as simple and efficient repair and maintenance management. The ergonomically favourable workplace, excellent visibility around the whole vehicle and the availability of high-quality modern comfort equipment also speak heavily in favour of the KAMAG PM. Approval for road use is also available.

The electrified KAMAG ePM version allows precise, fast and safe handling of swap bodies of all conventional sizes as well as semi-trailers and trailers without sacrificing operating comfort, ergonomics and functionality when compared to diesel-powered models. The electric drive ensures quiet and local emission-free operation that benefits both the environment and health of employees. The high energy efficiency and fast charging capability guarantee a high uptime of the vehicle.

The KAMAG PT is a very cost-effective and efficient tractor unit especially designed for the precise and fast moving of semi-trailers and container chassis. As a result, it sets new standards for performance, safety and ergonomics. Thanks to its high level of manoeuvrability, the KAMAG PT reduces manoeuvring times and increases the efficiency in yard operations. As a versatile and powerful vehicle, the vehicle is used in various industries including freight forwarding, logistics service providers, retail, wholesale as well as manufacturing. It complements TII KAMAG's extensive portfolio of yard logistics solutions.
